

**NIKKEN**<sup>®</sup> Discover it. Live it.

Quality sleep and water.  
**IT SHOWS!**

Nikken has been helping people achieve better health and well-being for over thirty years.

Its unique Sleep and Water technologies were specially designed and engineered to help you achieve better sleep, and enjoy invigorating water of exceptional quality.

## Do you go to sleep within approximately 15 minutes?

The National Sleep Foundation (NSF) in America found 18% of individuals reported difficulty falling asleep, 33% wake frequently and 23% wake too early.

A NSW survey found about 1/3 of respondents reported at least one symptom of insomnia. Lack of sufficient sleep can lead to irritability, moodiness, inability to concentrate, decreased resistance to stress, and major medical conditions.

# NIKKEN® SLEEP SYSTEMS

...dream on!

**Engineered by a team of medical professionals the Nikken Sleep System turns your bed into a “cocoon of comfort” throughout the year.**

The Nikken Sleep System is based on the way your body is naturally designed to sleep and combines three specialist Nikken sleep products to provide the ultimate support for the sleep your body needs.

**Nikken Ultra KenkoPad** placed on top of your existing mattress, transforms your existing mattress into a high-tech sleeping pad.

The Ultra KenkoPad is enhanced with Magnetic Technology in the Central Support Zone, plus Rubberthane to provide gentle support and massage.

**Nikken Dream Comforters** in regular and light fill weights provide year round comfort. Strategically placed magnets complement those of the Ultra KenkoPad to create the ideal sleeping environment.

Far-Infrared Technology is provided by ceramic-reflective fibres to help your body achieve the ideal sleeping temperature.

Nikken Ionic Comfort Technology is also included based on the concept of negative ions found in soothing outdoor settings.

**Nikken Dream Pillows** are likened to sleeping on a cloud.

Advanced Nikken technologies make the Kenko Dream Pillow an exclusively Nikken way to relax and enjoy restful sleep.

The breathable cover and ceramic tiles deep in the pillow release heat, while ventilation channels offer access to fresh air. The contoured shape delivers the support you need. Viscoelastic ‘memory foam’ adapts itself to your shape. Nikken Magnetic Technology in the pillow features a matrix design.

***There are two Nikken Sleep System options for you to choose from. The 'All Seasons Sleep System' is our top of the range sleep system containing Pad, Pillow(s) and both Regular and Light weight Comforters. The 'Original Sleep System' contains the Pad, Pillow(s) and either the Regular or Light weight Comforter.***

## Do you drink at least 2 litres of water each day?

Another essential that is often overlooked is an adequate intake of quality water as part of your daily routine. Water is one of the most essential elements to good health.

It is necessary for the digestion and absorption of food; supplies oxygen and nutrients to cells; rids the body of wastes; and regulates body temperature. Hence the importance of drinking a least eight glasses or two litres of clean water each day to maintain good health.

# PIMAG® WATER

*...for a great taste!*

**Water is the most important nutrient our bodies need every day of our lives.**

**The problem for many of us is that water from the tap is simply unappealing.**

**Fix that, and we would enjoy drinking a lot more water each day than we are currently doing.**

Nikken PiMag water treatment systems transform normal tap water into invigorating water of exceptional quality and conveniently deliver it for cooking and drinking.

Placed in the kitchen, family room, office, and even when holidaying using the PiMag Aqua Pour Express, both PiMag water treatment systems encourage people to drink more water on a daily basis, simply by making the experience refreshing and enjoyable.

#### **Features of these unique systems include:**

- Exceptionally clear, good tasting water.
- Sub-micron filtration.
- Reduces chlorine, odours and chemical contaminants.
- Magnetically energises the water.
- For home, office, factory, school...in fact wherever you are.
- No plumbing required and easy to install.
- Pristine quality water at just a few cents/litre and substantially less than the cost of bottled or delivered water.
- Eliminates bottle delivery, heavy lifting, and bottle storage.
- Choice of large storage and compact models.

#### **Models for every situation:**

- **PiMag Water System (15 litre capacity)**
  - Ideal for families and commercial situations.
  - Top-up during or at the end of the day for a never ending supply.
- **PiMag Aqua Pour Express (2 litre capacity)**
  - Compact for small bench-tops, caravans, taking on holidays.
  - Fast approx. 30 minute treatment time.
  - Filters into its own jug for immediate consumption or storage in refrigerator.

# NIKKEN KENKOSEAT®

*...comfort and support!*

**About one third of our time is spent sleeping, and for many this is followed by extended periods sitting through the day.**

**So, Nikken developed the portable KenkoSeat for consistent comfort and support during your daily routine and when travelling.**

From executives to truck drivers, from students to computer operators, today's men and women spend more of their time sitting than ever before. So it makes sense to provide the bones of your spine and abdominal muscles with consistent support while seated.

The KenkoSeat is engineered with specially placed magnets to provide deeply penetrating energy to help support your body through the day. And its Rubberthane core delivers exceptional comfort, breathability, ventilation and vibration suppression.

Nikken Far-Infrared Technology imparts gentle warmth as required, and the 100% pure wool cover makes the seat comfortable throughout the year.

## Do you maintain good posture while seated?

Good posture refers to the even distribution of the forces of gravity through our body so as to avoid undue pressure on particular joints, ligaments and muscles.

Unfortunately for many people compelled to remain seated for long periods of time, there is a tendency to slouch in the chair. Bad posture can cause fatigue, strain to the lower back and pain to the back and neck. Simple rules for improved posture include avoiding slumping forward; making use of a chair's lumbar back support; refraining from sliding forward on the seat; and taking occasional breaks throughout the day to stand and stretch.

*Nikken has now combined these three health technologies into one product*

## ***“The Nikken Kenko Combination (NKC)”***

**All Seasons Sleep System  
or Original Sleep System**

**PiMag Water System  
or PiMag Aqua Pour Express**

**KenkoSeat Standard**
